INPUT:

server.py > ...

```python
import socket

server_socket = socket.socket(socket.AF_INET, socket.SOCK_STREAM)
host = "127.0.0.1"
port = 5000

server_socket.bind((host, port))

server_socket.listen(1)

print("Server is waiting for a connection...")

client_socket, client_address = server_socket.accept()

print("Connected to:", client_address)

message = client_socket.recv(1024).decode()

print("Message received from client:", message)

response = "Message received successfully!"
client_socket.send(response.encode())

client_socket.close()
server_socket.close()
```

```python
client.py > ...
import socket

client_socket = socket.socket(socket.AF_INET, socket.SOCK_STREAM)

host = "127.0.0.1"
port = 5000

client_socket.connect((host, port))

message = "Hello Server! This is the client."
client_socket.send(message.encode())

response = client_socket.recv(1024).decode()

print("Server response:", response)

client_socket.close()
```

OUTPUT:

```
C:\Users\Mangi Malviya\OneDrive\Desktop\Computer_Networking_Lab\Experiment1>python server.py
Server is waiting for a connection...
Connected to: ('127.0.0.1', 53694)
Message received from client: Hello Server! This is the client.
```

```
C:\Users\Mangi Malviya>cd "C:\Users\Mangi Malviya\OneDrive\Desktop\Computer_Networking_Lab\Experiment1"

C:\Users\Mangi Malviya\OneDrive\Desktop\Computer_Networking_Lab\Experiment1>python client.py
Server response: Message received successfully!
```
